CONTENTS

Session 6 of this Test Project consists of the following additional files:

1. WSS2020_QR_TP_S6.pdf   (Session 6 instructions)

INTRODUCTION

In this session, you will prepare for and make a presentation about ASEAN Skills 2020 application that you have developed.

INSTRUCTIONS FOR THE COMPETITOR

In this session, you will be given 2 hours to prepare your slides for your presentation. You are allowed to surf the Internet to prepare your presentation slides.

You are not allowed to look at your application while you are preparing your slides or include any screenshots from the application or test project in your slides.

After that, you will draw lots to determine the order of presentation.

Each of you will be given 10 minutes to make your presentation and 5 minutes Q&A.

Any staff or student can sit in during your presentation but only the investors (i.e. evaluators) can ask you questions. You will, however, not be allowed to sit in for the presentations by the other competitors. You will remain in a waiting room until you are called for your presentation.

NOTE: This is not a technical presentation so you are not expected to focus too much on how each of your features/screen were coded or works. Instead, focus on how your system can improve the way the event is organized and run. Imagine you are presenting to an investor and are trying to convince them to invest money so that you can develop your application.

DELIVERABLES

6.1 Presentation
You are given 2 hours to prepare a presentation using Microsoft PowerPoint. You can surf the Internet while preparing your slides. Your presentation should focus on the business value of your system and how it can help the organizers to better organize and run the event. Do highlight the key strengths of your application.   You will draw lots to determine the order of presentation. During your presentation, you will be given 10 minutes for your presentation followed by 5 minutes Q&A.
